1. Settings

Settings enable you to define the Acme system, based on these settings the entire Acme system will work. Before you could use Acme system, all these settings must be done in order to work with the Acme.

To define settings:

1. Click on the **Utilities** module
2. In the left side pane, under **Configuration** menu > click **Settings**.

The *Setting dialog box* will be displayed. type of setting like Global, UI, Configuration for multiple reasons

The screenshot shows the 'Settings' dialog box with the 'Global Setting' tab selected. The 'Currency' section is highlighted with a red box. It contains the following fields: 'Country' (Kenya), 'Symbol' (KSh), 'Currency Position' (Before), 'Negative Sign' (()), 'Digit Grouping' (123,456,789), 'Grouping Separator' (,), 'Decimal Places' (2), and 'Decimal Separator' (.). Below this is a 'Preview' section showing 'Positive' as 'KSh 123,456,789.00' and 'Negative' as '(KSh 123,456,789.00)'. At the bottom, there are checkboxes for 'Show Customization form after loading Report' (checked) and 'Enable Tax Deducted at Source (TDS)' (unchecked), followed by a 'Payroll Staff Comment Password' field, 'Credit Type' (dropdown), and 'Location' (Primary). 'Apply' and 'Cancel' buttons are at the bottom right.

Note: This is the global setting where we set the local/default currency for the entire application.

3. In the **global** setting tab.
 - a. Based on the selection of the **country** by default the country currency details will be displayed. It will be local currency for the applications

- b. Click  button apply the settings to the acme.erp application.

The following *Confirmation message* will be displayed. “The application will be restarted to apply settings. Do you want to continue?”

- c. Click  button.

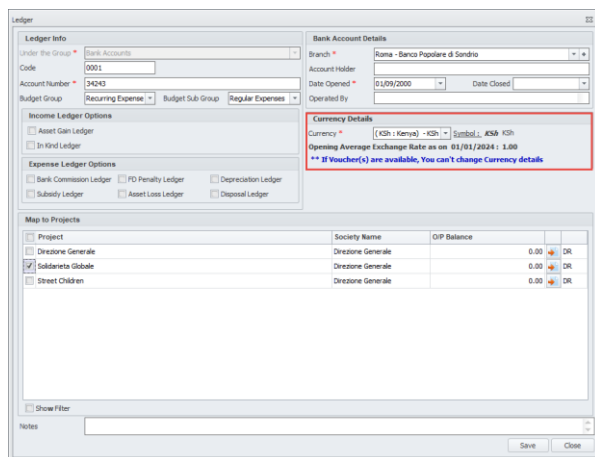

Click  to prevent from the applying.

2. Bank Accounts

1. Click on the **Finance** Module.
2. In the side panel, under **Masters** menu > click **Bank Account** menu
The *Bank Accounts form* will be displayed.

3. Click on the  **Add** button.

The Bank Account *Ledger form* will be displayed.

Currency Details

Currency: KSH (Kenya Shilling) Symbol: KSh
Opening Average Exchange Rate as on 01/01/2024 : 1.00
** If Voucher(s) are available, You can't change Currency details

Notes

Save Close

Currency for the Bank Account:

Option is given to set the currency for the Bank Account based on the projects

4. Set the Currency for the Bank Account for listed projects displayed.

Note: This bank account's currency is determined based on the projects.

5. Once the Currency selected for Bank Account and made a transaction, then the **Currency symbol** will be displayed in blur mode. You cannot change it unless the transaction is existing

6. Click on the  to save the changes. (Or)

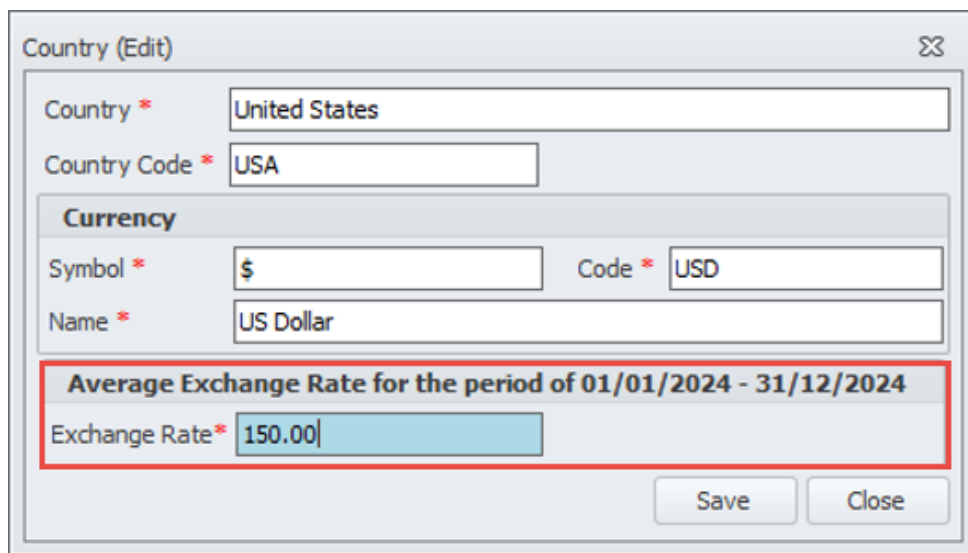

Click on the  button to prevent from the saving.

3. Country

A territory separated by a definite or an indefinite boundary and governed by a politically organized group is called as country. Example: India, China, USA, etc. In Acme.erp country is a master used while adding donor, governing member, auditor, etc.

1. Click on the **Finance** module> **Masters** > Click **Country**.

The *following page* will be displayed.

The screenshot shows the 'Country (Edit)' form. It has the following fields and values:

- Country *: United States
- Country Code *: USA
- Currency section:
 - Symbol *: \$
 - Code *: USD
 - Name *: US Dollar
- Average Exchange Rate for the period of 01/01/2024 - 31/12/2024 (highlighted with a red box):
 - Exchange Rate *: 150.00

At the bottom right, there are 'Save' and 'Close' buttons.

Note: In the first accounting year, set the exchange rate for the selected country and verify the other attributes.

2. Enter the **Country** and **Country Code** in the text box.
3. Enter the **Symbol**, **Code** and **Name** in the text box.
4. Enter the **Exchange Rate** in the text box.
5. Click on the  button to save the changes (Or)

Click on the  button.

4. Map Accounts

1. Click on the **Finance** Module.

2. In the side pane, under the **Options** menu > click on the **Map Accounts** menu.

The *Following form* will be displayed.

3. In the **Account Mapping** form, click on the **Currency Exchange rate** tab.

Currency	Country	Exchange Rate
(₹ : India) - Indian Rupees	India	1.00
(EUR : Italy) - Euro	Italy	160.00
(KSh : Kenya) - KSh	Kenya	1.00
(\$: United States) - US Dollar	United States	150.00

Average Exchange Rate for the period which is mentioned on top, can be applicable while making Vouchers.

Note: In the first accounting year, you need to set the exchange rate only for the specified country at the top. From the second accounting year onward, you will set the exchange rate in the mapping screen.

4. Select the **Available currency** from the checkbox.

5. The click on the **Move Out**  button to move to the exchange rate side.

6. Then fix the **exchange amount** for the country.

7. Click on the  button to save the exchange rate details. (Or)

Click on the  button to prevent from the saving.

5. Vouchers

Types of Vouchers are; (Here only given for Receipt and Payment Vouchers)

- ◆ Receipt
- ◆ Payment
- ◆ Contra

◆ Journal

Note: For example, we have provided these two receipts and payment vouchers; you can follow the same approach for contra and journal entries as well.

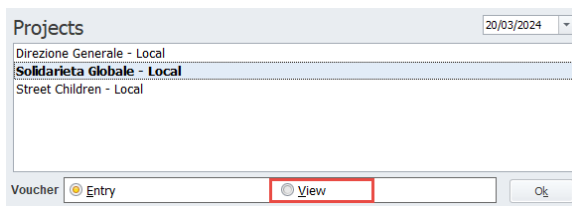

5.1. Receipt Vouchers

Receipt is an acknowledgment for any Income that has been received in an organization. In Acme.erp, receipt is a voucher where the details of all the Income received are recorded. Receipt entry is made against the project.

To view receipt:

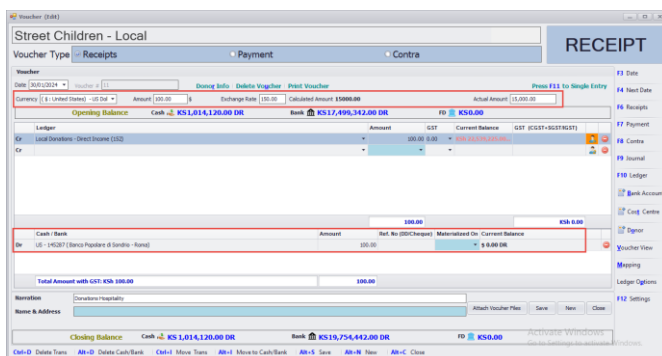

1. Click on the **Finance** Module.
2. In the side pane, Under the **Accounting** menu > click on the **Receipt** menu.

The *Project form* will be displayed.

3. Select the **Project**.
4. Click on the  **View** button.
5. Click on the  **Ok** button.

The *Voucher Receipt form* will be displayed.

6. Select the **Date** from the calendar dialog box.

Note: Based on the Selection of the currency bank account will be displayed

Select the **Currency** from the list box, based on the selected currency Bank Account will be filtered which is mapped.

- a. Enter the **Amount** in the textbox.
 - b. The **Exchange Rate** will be displayed automatically.
 - i. **Note:** The **Exchange Rate** will be shown in the **Map Accounts** that we mapped under currency tab.
 - ii. Also, can **edit** the **Exchange amount**
 - c. The **Calculated amount** will be displayed based on the **Amount** and **Exchange Rate**.
 - d. The **Actual Amount** will be displayed based on the **Calculated amount**.
 - e. Select the **Ledger** from the list box.
 - f. The **Amount** will be displayed automatically. If the currency different from local currency the bank account currency will be displayed
7. Click on the  button to save the voucher details.

Note: *The funds collected through Dollar can be converted to local currency only in the global setting where you have specified.*

5.2. Payment Voucher

Payment is an acknowledgment for any Expense that has been spend in an organization. In Acme.erp, Pay is a voucher where the details of all the Expense are recorded. Payment entry is made against the project.

1. In the side pane, Under the **Accounting** menu > click on the **Payment** menu.
The *Project form* will be displayed.
2. Select the **project**.

3. Select the **Date** from the calendar dialog box.

Note: Based on the Selection of the currency bank account will be displayed, it can be taken as bank currency

Select the **Currency** from the list box, based on the selected currency Bank Account will be filtered which is mapped.

- a. Enter the **Amount** in the textbox.
 - b. The **Exchange Rate** will be displayed automatically.
 - i. **Note:** The **Exchange Rate** will be shown in the **Map Accounts** that we mapped under currency tab.
 - ii. Also, can **edit** the **Exchange amount**
 - c. The **Calculated amount** will be displayed based on the **Amount** and **Exchange Rate**.
 - d. The **Actual Amount** will be displayed based on the **Calculated amount**.
 - e. Select the **Ledger** from the list box.
 - f. The **Amount** will be displayed automatically. If the currency different from local currency the bank account currency will be displayed
4. Click on the  button to save the voucher details.

Note:

1. If the currency is different from the local currency, then the amount will be recorded in the foreign currency, but the user can transact using the local currency.
2. If the bank account is in US dollars, the amount can only be spent in dollars for payment.

6. Reports

In Acme software, all received and paid values are displayed in the default global currency symbols set in the application, except for the Cash Journal and Bank Journal. Cost center reports are also included. The sample report below can generate all reports based on the specified criteria.

6.1. Monthly Abstract Receipt and Payment Report

Monthly abstract receipts and payments shows both receipts and payments made under different ledgers with respect to selected project(s) and date range.

To view monthly abstract:

1. Under **Report** menu > click **Finance**.
2. Under **Abstract** > click **Monthly Abstract (Receipts and Payments)**
3. Select the options, which you are going to view / download the report.
4. Click **Ok** button, the *Monthly Abstract Receipts and Payments* report will be displayed.
